Python Django angular full stack web development

Luminar technolab (2023 - 2024)

Electronics and Communication Engineering

Government Residential Womens Polytechnic, Payyanur 2020-2023

Plus Two

Iduzhi Madhavan Nambuthiri Smaraka Government
Higher Secondary School Mayyil 2020

SSLC

Iduzhi Madhavan Nambuthiri Smaraka Government
Higher Secondary School Mayyil 2018

SOFTWARES

Bootstrap | Django | Css | Python | Angular | Html | Rest API

PROJECTS

Thailand Travel Package (Tourism Website)

I have created a website based on "Tourism Management it is a "Thailand Tourism Booking website using Python, Django, HTML, CSS, Bootstrap (Framework), Javascript.

Telegrambot

I have created a telegram chatbot.A Telegram bot is a program that acts like a conventional chat partner but comes equipped with additional functions. Bots can perform predefined tasks without any user involvement. Furthermore, a Telegram bot can do everything a human chat partner does either automatically or on particular requests. This includes basic functionality such as relaying information like text messages, videos, images, or any other files. Consequently, with a Telegram bot, it is possible to automate real-time alerts to notify users when something of interest happens.The telegrambot is build by using node js,npm,telegraf,telegram account.
